

WAMAS Core WMS - Less Is Often More

The entry-level variant for small and medium-sized enterprises

WAMAS Core WMS (formerly GO!) is a tailored warehouse management solution for medium-sized storage systems, ranging from manual to semi-automated. It is based 100% on our successful WAMAS logistics software. It includes a wide range of functions to help you get the most out of your warehouse technology - from goods-in to storage, from picking to shipping. The modular structure of

SSI SCHAEFER's WAMAS Core WMS makes it easy to expand - an attractive feature, as it allows further growth to be reliably mapped while maintaining profitability. So if you want to upgrade from manual organization to a software-based warehouse management solution, WAMAS Core WMS is the ideal choice!

Benefits at a glance:

- **Full control:** Quality assurance starting right from goods-in, 100% inventory transparency and traceability, stock accuracy with system-guided storage and retrieval and continuous inventory
- **Efficient warehouse:** Ideal storage location allocation and optimal capacity utilization, reduced picking error rate for greater efficiency at lower cost, on-time provision of delivery orders in the shipping area
- **Ease of use:** Straightforward integration into new or existing intralogistics structures, fast implementation and minimal training expense, easy adaptation and open for future changes

Because everything is completely controlled by WAMAS we now save about 30% time. In addition, the system ensures 100% inventory transparency and traceability. The error rate has also been decisively reduced.
