SSI SCHÄFER

YOUR IT PARTNER FOR THE FUTURE

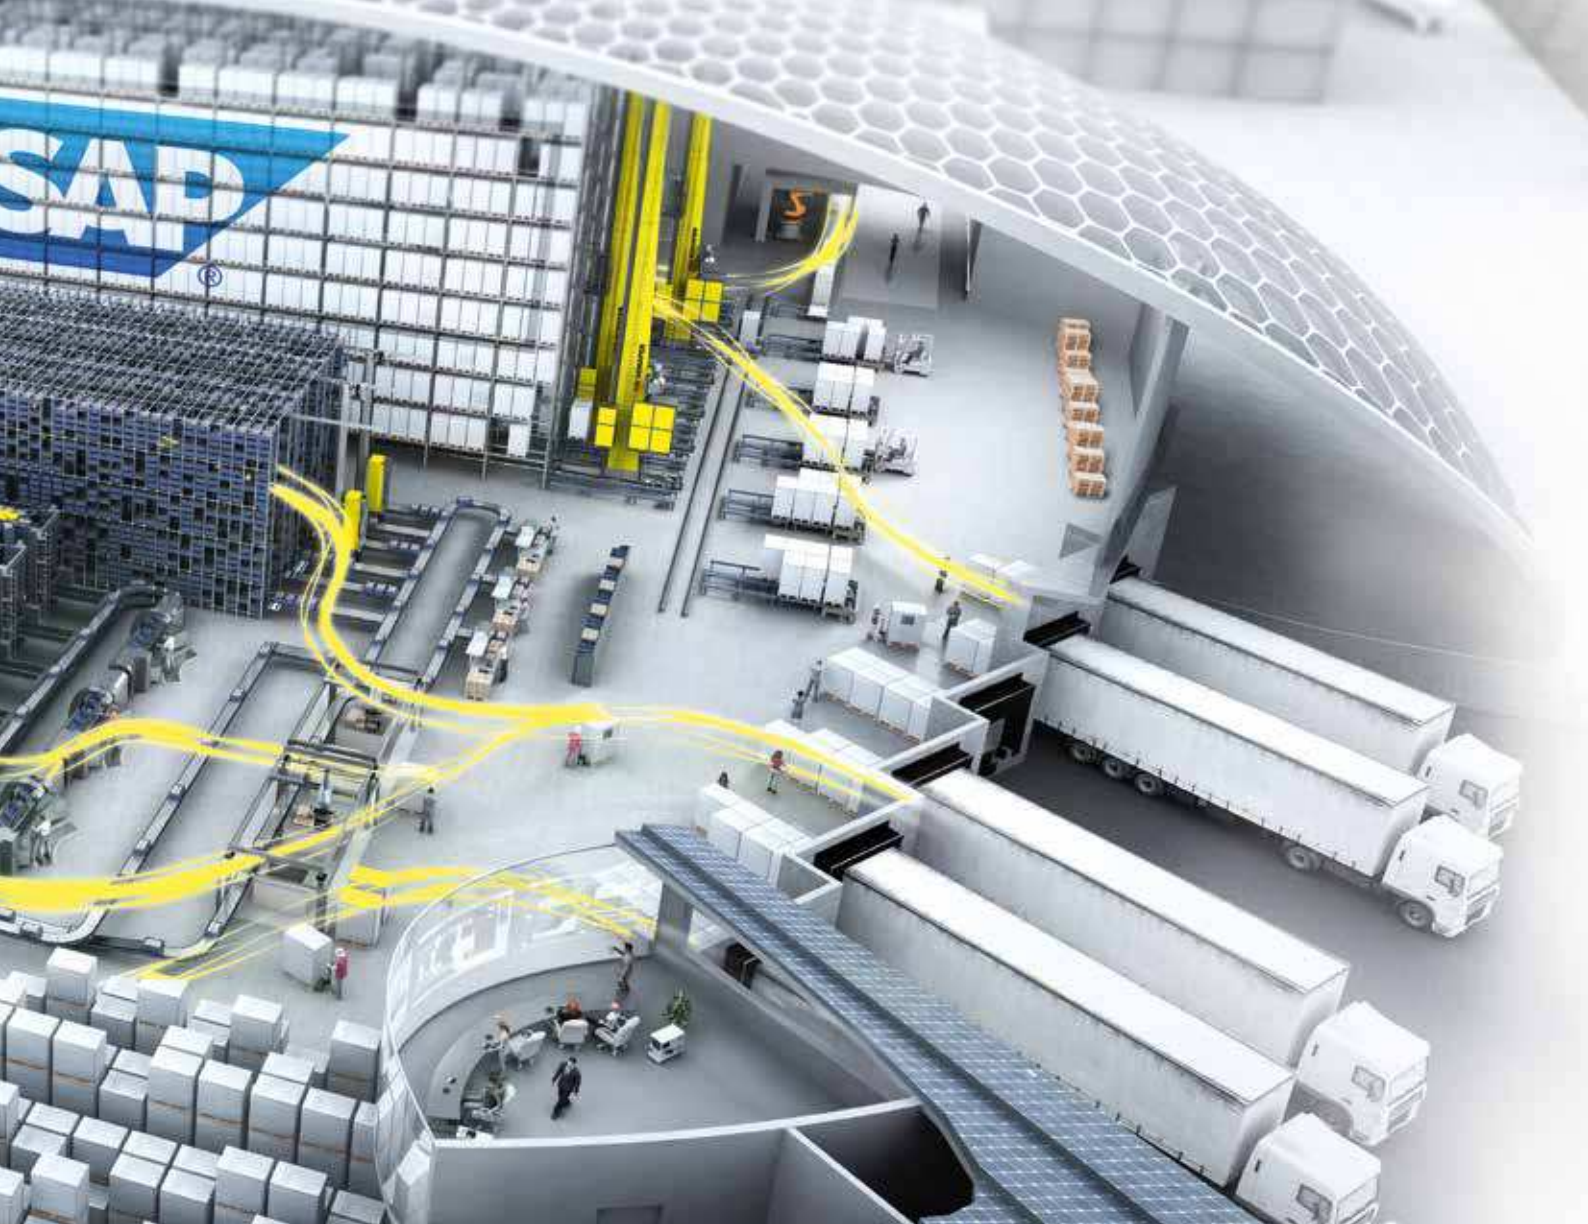

Long-term support and comprehensive software for the challenges of tomorrow.

Future-proof logistical solutions need to interface seamlessly with individual processes, offer infinite expandability and adapt flexibly to new conditions. That is where SSI SCHAEFER and its scalable software solution come in. As a partner you can rely on, SSI SCHAEFER understands your business processes, provides you with long-term support and reacts instantly no matter where in the world you are located.

Intralogistics IT backed by over 1,000 developers
As the world's leading intralogistics expert, SSI SCHAEFER not only provides a full range of intralogistics products and services but also offers SAP Extended Warehouse

Management (EWM), the world's leading warehouse software, as an SAP Silver Partner. The SAP SCM logistics solution is after all part of our IT Powerhouse. Here more than 1000 highly qualified IT experts create customized solutions, based on extensive process know-how and a deep understanding of your specific industry requirements – regardless of the size of your business or of your kind of intralogistics landscape.

As a financially independent family business, we think long term so you can rely on us being there for you tomorrow and the day after.

TOP PERFORMANCE INTRALOGISTICS IT:

- State-of-the-art software technology
- IT Powerhouse with over 1,000 software experts
- Continuous solutions for intralogistics and supply chain management
- Global service network and 24/7 support
- Consulting, implementation, optimization and training
- Innovative KPI analysis for improved processes
- Process analysis and visualization for maximum transparency and efficiency

**Meet your challenges with a reliable partner at your side.
Backed by SAP SCM and our leading IT expertise, your intralogistics will become simpler,
more flexible and cost-effective over the long run.**

CONCENTRATED SAP POWER FOR YOUR BUSINESS

The best software and highly qualified experts for increased efficiency.

Comprehensive solutions are important to us. That is why, depending on your specific logistics concept and strategy, we translate all your key logistic processes precisely into SAP. This comprises everything from initial system configuration to end-to-end customization, the development of individual extensions and setting up all the system interfaces. As a certified Silver Partner, we are closely involved in the development and certification process of branch-specific SAP solutions.

SAP EWM for more process and operational security

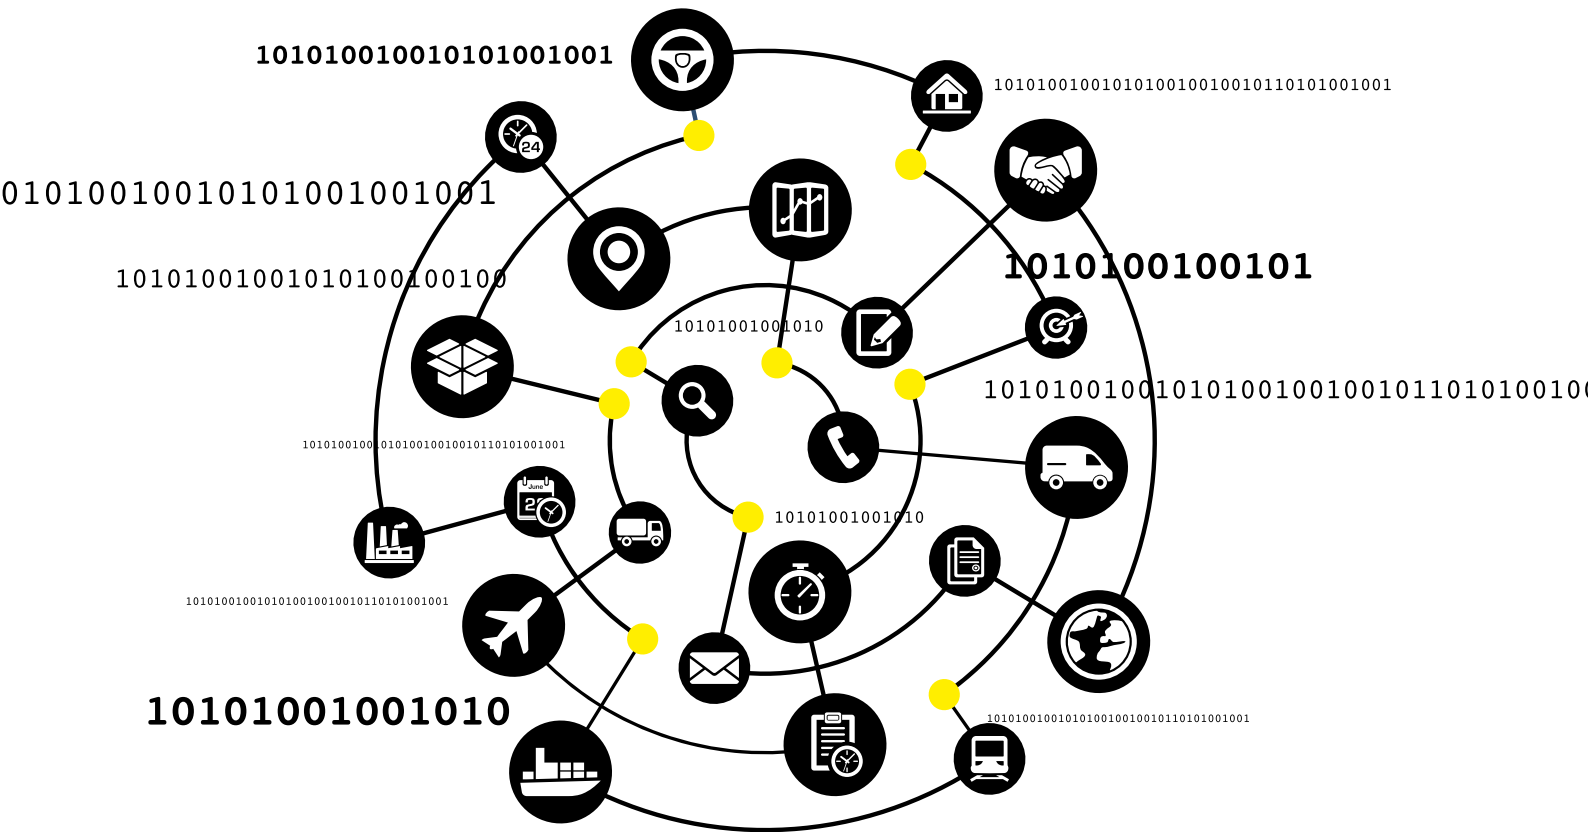

The latest technological expertise makes SSI SCHAEFER your best partner with implementation experience. Using SAP EWM, an extremely user-friendly software, we are able to integrate, flexibly configure and efficiently manage both manual and automated processes.

We have made a philosophy out of smooth-running projects

Whether for your new warehouse, a retrofit or the migration of an older installation, you can rely on our project experience with SAP Solution Manager. We identify and gather requirements, draft specifications, provide assistance during realization, test phase and go-live and offer user training courses. The SAP Solution Manager takes care of all central planning and documentation tasks and system configuration. By working together, you, our experts and the SAP Solution Manager form a well-established team from initial licensing through going live and beyond.

WE OFFER A COMPREHENSIVE SAP SERVICE PACKAGE FROM A SINGLE SOURCE:

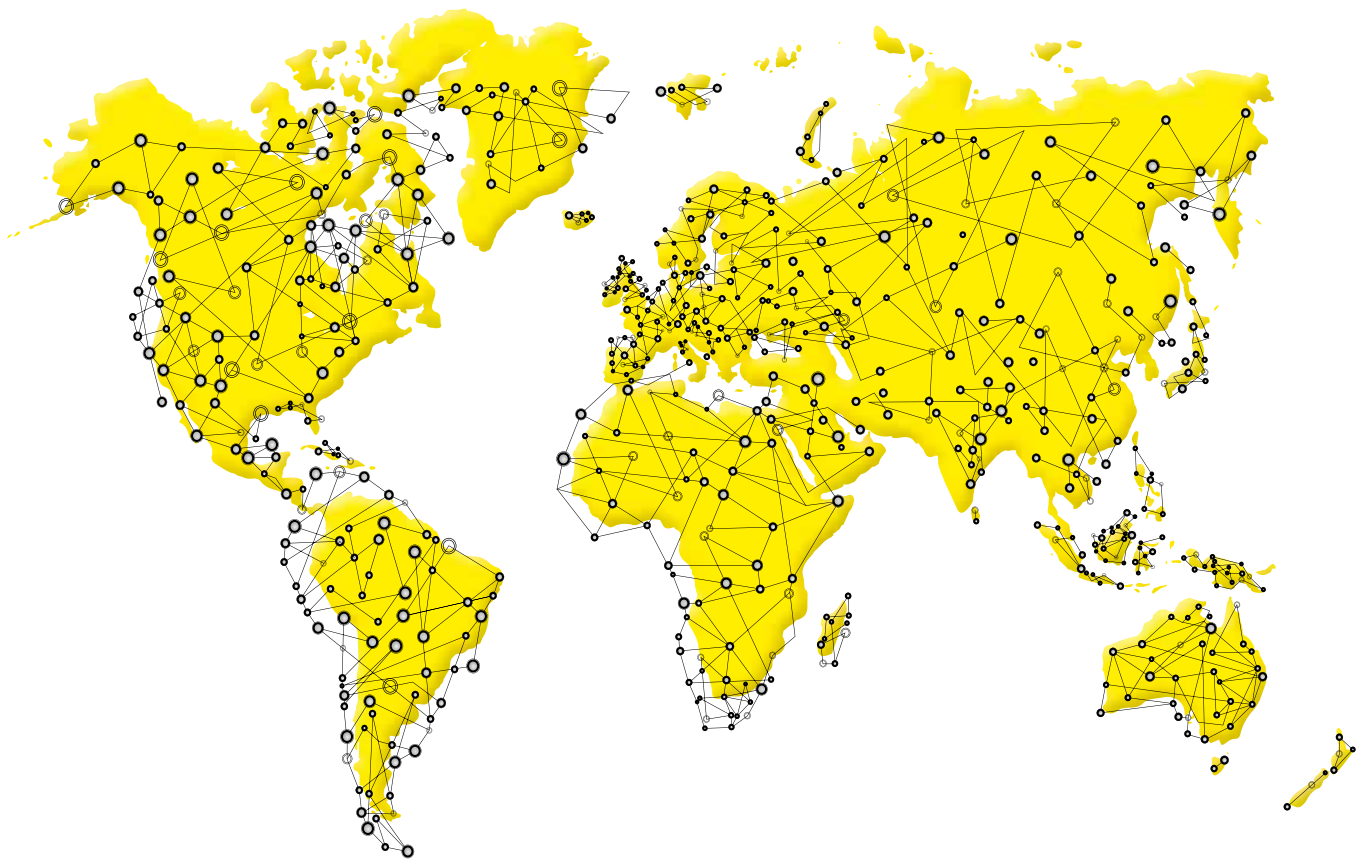

- SAP EWM / TM software
- SAP licences
- SAP sizing
- Process and migration consulting
- Server- and workstation hardware
- Service (24/7)

ADDED VALUE THROUGHOUT THE SUPPLY CHAIN

Your complete warehouse in one software solution – SAP EWM ensures perfectly aligned data and material flow across all your processes.

- Supply Chain Execution:**
 Administration and control of the complete supply chain from the supplier to the end customer, including returns.
- No Interface Risk:**
 Thanks to integrated warehouse management that is directly connected to existing SAP ERP or other SAP systems.
- Material Flow Management:**
 Management of complex material flows, including modern high-bay warehouses, shuttle warehouses and picking systems.
- Resource Management:**
 High profitability through the use of all available resources in a modern warehouse combined with the fastest possible order handling.
- SAP Dialogs on UI5 and Fiori:**
 State-of-the-art technology such as UI5 dialogs or the use of Fiori apps integrated into the logistics process improve transparency and facilitate constant data quality.
- Yard Management Implementation:**
 SAP EWM Yard Management allows you to complete requirements before and after intralogistic processes and avoid delivery or removal bottlenecks.
- Connection EWM to S4 / HANA:**
 Integration of the logistics processes as a central or decentralized instance in S4 / HANA.

24/7 GLOBAL AVAILABILITY

More than 70 locations for maximum system availability – guaranteed.

As a reliable partner, we speak your language and provide you with close personal support throughout the entire life cycle of your software solution.
