# BIN COLOURING

SSI SCHAEFER offers a wide colour spectrum from which you can choose your bin colour. The required colour batches are available on stock and grant you short lead times.

Establishing a defined colour, for example from the RAL or PANTONE range can be a complex and costly production process and depending on the available additive will be similar to the colour chart.

Colour variations could occur due to specific manufacturing conditions. All colours are free from cadmium. The processed products do not include any substances which are listed in the SVHC register of the European Chemicals Agency (ECHA).

## Combination Possibilities

SSI SCHAEFER provides the opportunity to choose the colour of the several bin components freely i.e. different colour body and lid. The identification of waste streams can be carried out with the help of this. We offer a variety of solutions for your individual bin colour design.
