Mandatory annual inspection for storage facilities

Storage facilities and racking systems are work equipment. In terms of safety, this equipment has to be inspected regularly by a qualified person. The process of these expert inspections are defined in the standard DIN EN 15635.

Our certified and experienced rack inspectors dispose of the required expertise to perform such expert inspections.

Contact us! We will provide advice and support.

The following racking systems require inspection:

- Modular shelvings
- Pallet rackings
- Drive-in rackings
- Drive-through rackings
- Cantilever rackings
- Live storage shelvings
- On-line shelvings
- Mezzanines
- Mobile rackings
- Multi-tier facilities

J1

Modern, complete solutions for waste and recycling collection

Modern waste management systems need to be safe, reliable and durable.

Customers worldwide trust in SSI SCHAEFER's waste management and recycling expertise. The company offers sophisticated systems for both recycling materials and returning them to the economic cycle and effectively disposing of waste materials.

Working in collaboration with municipal and private waste management companies, SSI SCHAEFER has developed

a waste engineering program based on countless, successful applications. This solution is now utilized worldwide as the solution for waste management tasks.

SSI SCHAEFER creates the foundation for hygienic and convenient raw material recycling. In the process, the company ensures the more conscious and environmentally-friendly use of materials.

The effective collection systems offer solutions for the ecological and economical challenges of our time.
